# Supervision Mode by the Third Party independently

March 12<sup>th</sup> , 2015

## Original creation of Supervision by the Third party independently

**Development and promotion of the long-term mechanism of “non-confrontational environmental protection and social governance”. Accept the commissions from different levels of government and ecological protection courts. Carry out independent Third-Party supervision on environmental protection departments, quality monitoring departments, agricultural departments, tourism sectors and polluters. Help the polluter and industrial parks to create the eco-friendly enterprises in the environmental sensitive areas by assisting the local government, enterprises and community residents.**

# Third-Party Supervision

1、 The first case of ENGO as the Third Party conducting the supervision in China-Supervision on ZhaZuo production and processing bases of Guizhou Haolduo Dairy Industry Co., Ltd.

2、 Supervision on vegetation restoration in Shunhai forest farm ,Wudang District, Guiyang City

3、 Qizhen Government buy the social service-non profit organizations as the third party to conduct the supervision

4、 Guizhou Aluminium Group Co., Ltd commissions social organization- GPEEC as the Third-Party to conduct environmental supervision

5、 Sanlian Dairy-Acropolis dairy farm commissions social organization- GPEEC as the Third-Party to conduct environmental supervision

6. Time of Guizhou - Ancient Town Construction Project commissions social organization-GPEEC to build the eco-frindly enterprises together.

## The Third-party Supervision on Guizhou Aluminium Group Co., Ltd

Origin: according the “Consignment Agreement on Public Participation in Three-party Environmental Supervision” and active promotion of ““Three Joint” Mechanism for the Building of Ecological Civilization in Qingzhen, Guizhou Aluminium Group Co., Ltd entrust the environmental public interests organization-GPEEC as the independent third-party supervision organization. And a “Agreement on Entrusting Environmental NGO as the Third Party for Independent Supervision” was signed to mobilize the public participation and public supervision.

贵阳公众环境  
教育中心  
REUSE. REDUCE. RECYCLE

Advantages: (compared with the old mode of pollution control in past)

Supervise polluters timely through the involvement of NGO and the public.  
Define the subject of liability and guarantee the transparency, fairness and justness of governance process through community supervisors' reporting, the third party's review and environmental departments' confirmation.

Change antagonism into cooperation with corporation involvement, build green enterprise, reduce environmental risks of enterprises, help to disseminate the environmental protection concept of the enterprises and establish and strengthen corporations' sense of social responsibilities

## 广铝第三方独立监督工作开展情况

GPEEC assigned staff to settle in the company and conducted investigation of the pollution sources, environmental protection equipments, environmental protection measures as well as surrounding enterprises to identify pollution liabilities (Polluters are responsible for the pollution) .

Local villagers recommended by local government got training from the GPEEC on environmental knowledge and laws and regulations. Then GPEEC awarded the appointment letter to them and asked them supervise the Guizhou Aluminium Group and surrounding enterprises in real time. By doing these, the local villagers exercise their right of public supervision according to the laws and know the real pollution situation there.

## Implementation of Three-party Environmental Supervision on Guizhou Aluminium Group Co., Ltd

For the noise produced during the process of crushing raw materials, the staff from GPEEC entered the sites and checked firstly, then submitted the investigation report and suggestions to the Ecological Bureau and Guizhou Aluminium Group. After that, the Ecological Bureau assigned the monitoring staff to monitor on site. Based on the monitoring results, Guizhou Aluminium was asked to reduce the noise to lighten the impact to the residents' life nearby.

As soon as the local supervisors found smoke, noise, dust and water pollution issues from Guizhou Aluminium Group and surrounding enterprises, the GPEEC reports to the Ecological Bureau. Then the Bureau told the enterprises to reduce the pollution, then GPEEC feeds back to the supervisors and asks them to observe the pollution reduction situation.

GPEEC submits monthly working reports to the Ecological Bureau to keep them know the local pollution situation.

## Pictures of the supervision work

The staff from GPEEC was checking the Smoke from the chimney of the thermoelectricity plant

The staff from GPEEC was teaching the local supervisor how to use the pH test paper

# Achievement

By one-year's supervision of GPEEC together with local supervisors, the environment protection situation in Guizhou Aluminium Group Company and several surrounding enterprises is improved. When the pollution is found by the local supervisors, they will inform the Ecological Department, and then the Ecological Department will ask the enterprises to stop or reduce the pollution. By doing this, the supervisors see the supervision effects. On the other hand, many enterprises know that there is sb. supervising them all the time, which means the Ecological Department can know the pollution situation in time. So the environmental protection awareness of the enterprises is strengthened. Guizhou Aluminium Group Company can make corrective actions as soon as polluting is found, and based on the questions raised by the local supervisors, they conduct investigation and adjustment to reduce the destruction to environment as well as the effects to the surrounding peoples.

# Qingzhen Government hire non-profit organization to participate in Third-Party Environmental Supervision-Implementation situation

## Background :

Qingzhen is located in the ecological protective screens of Pearl River and Yangtze River. It is 20 km away from Guiyang City, which has the drinking water source providing drinking water for all of the residents in Guiyang City. Besides, there are abundant resources in Qingzhen. There are chemical industry, Metallurgy industry, Medicine industry, cement industry and coal and coal chemical industry, aluminum and aluminium fabrication industry. As the sensitive location, there are one important issues which is how to keep the environmental protection and economic development run in parallel. Qingzhen government attaches lots of attention to environmental protection in the administrative region of Qingzhen. However, with the economic and social development, the environmental issues becomes more and more important. Now the lack of environmental law-enforcing supervision capacity becomes very prominent. And lack of working staffs and measures, difficult coordination between different departments and short of legal system cause a lot of problems, for example, unmatched relation between the mission and strength, non-equivalent relation between responsibilities and the rights , awkward situation because of the difficult execution of some laws and regulations and incapable working staff of environmental protection departments. We must reform the environmental law-enforcing supervision system and develop new measures which are not only dependent on the effort of administrative enforcement of law, but also dependent on the social force to make the environmental law-enforcement, publics and public opinions supervision and judicial supervision combined together closely, forming the comprehensive and three-dimensional law-enforcing system. Promote the building of ecological civilization in Qingzhen. At the end of 2012, “Three Joint” Mechanism was built for the development of Ecological Civilization in Qingzhen. There are Mechanism of Public Participation, Administrative Collaboration Mechanism of Law Enforcement and Mechanism of Judicial Collaboration which constitute “Three Joint” Mechanism.

## Effect of the law enforcement in “Three Joint” Mechanism

The effect of implementation of “Three Joint” Mechanism is quite good. Now many enterprises are changing concepts gradually. They conduct pollution treatment actively, exploit resource scientifically, transform the resource locally and restore the vegetation. However, as the capacity of the environmental law-enforcement in Qingzhen is need to be improved, there are also some blind spots existing in the supervision on so many enterprises. In order for a further development of public participation mechanism, Qingzhen Government initiated the cooperation with GPEEC, and invited GPEEC to supervise the enterprises and related departments, which perfect the Qingzhen environmental protection mechanism further.

# 1、 Work of Qingzhen government

“Three Joint” Mechanism comprises Mechanism of Public Participation, Mechanism of Administrative Collaboration in Law Enforcement and Mechanism of Judicial Collaboration. The Public participation mechanism include: develop one 300-members volunteers team for the ecological civilization construction and one ecological protection messengers team with 400 members. The Mechanism of Administrative Collaboration in Law Enforcement includes: establish one comprehensive law enforcement team for ecological protection, set up a prized ecological protection reporting center, establish the ecological civilization construction fund, build the EDA center and so on. In order to improve the Judicial Collaboration Mechanism, the Municipal Procuratorate set up the Ecological Protection Supervision Bureau and Ecological Protection Court in the municipal court. Besides, the Municipal Public Security Bureau together with the Procuratorate and Court established the Judicial ecological restoration park, which is made as the ecological civilization education base.

2、

## Responsibilities of GPEEC

Based on the “Three Joint” Mechanism, GPEEC carries out the inspection on the above functional departments’ performance of duties in the form of tabulation, follows up the relevant environmental protection activities. At the same time, GPEEC assists the environmental departments to carry out the environmental supervision and correction work on the enterprises. GPEEC submit working reports to the government and enterprises monthly. During the development of “Qingzhen Environmental Mode”, GPEEC assist Qingzhen municipal propaganda department to do the promotion work step by step. In detail, GPEEC is responsible for contacting the Guizhou Metropolitan Daily, Guiyan Daily and other medias to do the special report.
